

# Param 5500

Self-leveling Polished Concrete

**düraamen**  
engineered to perform

# The Modern Concrete

## Designer Polished Concrete Flooring

When designers and architects think of modern design, they think of concrete. Strikingly modern aesthetics can be achieved using polished concrete in the interior spaces of homes and businesses.

With Param 5500 Self-leveling Polished Concrete, you too can realize the modern design that only a polished concrete floor provides. Installation of Param 5500 does not require the tools and labor necessary to grind a concrete surface like traditional polished concrete.

Achieve nearly any polished concrete design using colorants. Concrete dyes and stains are available in numerous colors, while gloss and satin topcoats further your design options.

# The Anywhere Floor

- › Lofts & High Rise Apartments
- › Residential Homes and Condos
- › Offices & Meeting rooms
