# Exterior Beauty

## Concrete Resurfacing for broom and spray down finishes

Uberdek is an extraordinary polymer modified concrete for resurfacing existing indoor or outdoor concrete surfaces.

It's a super cost-effective solution when compared to the expensive and time-consuming process of replacing concrete. Uberdek can be applied over horizontal and vertical concrete surfaces that are worn, spalled and distressed.

Uberdek is suitable for decorative trowel finishes or broom finishes on sidewalks, driveways, garage floors, patios, walkways, pool decks, and stairs.

Commercial properties like retail store fronts, amusement parks, hotels, entertainment venues and stadiums use uberdek in their high-traffic outdoor and indoor concrete.

Super-durable and designer friendly, for residential or commercial use, Uberdek is the concrete overlay of choice when it has to look great and last long.

# Versatility

Uberdek is versatile, allowing for decorative trowel, broom, and spray finishes. It's compatible with most stains and dyes and is easy to use. Just add CP1000 and mix.

Easily create simple broom-finished concrete on sidewalks, driveways, garage floors, patios, walkways, pool decks, and stairs, or get more creative by utilizing dye, stains, and decorative trowel techniques.

# Features

Uberdek is versatile allowing for decorative trowel, broom and spray finishes. It's compatible with most stains and dyes and is easy to use. Just add CP1000 and mix. More technical features are listed below:

Excellent freeze thaw stability

Low VOCs

Slip-resistant finish

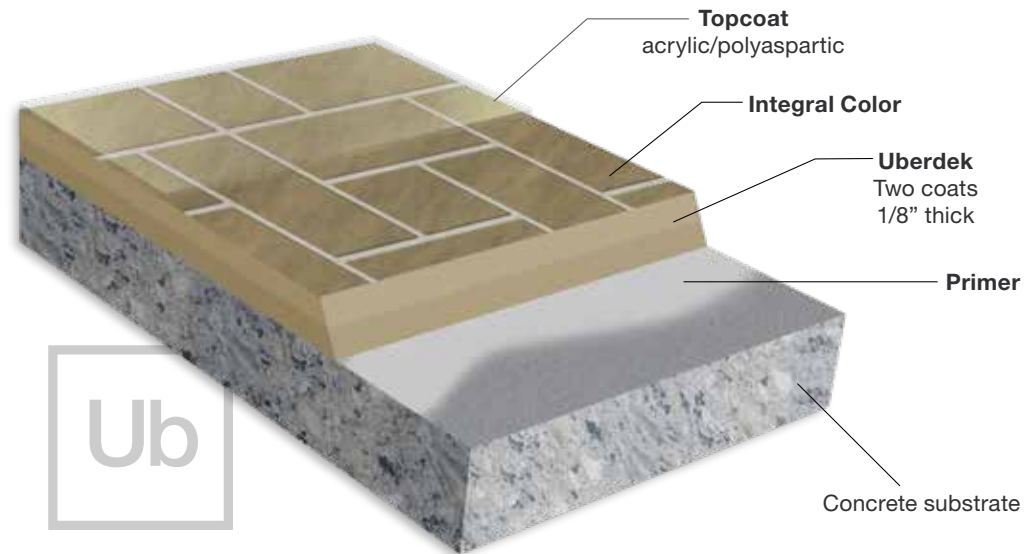

Fast install and quick return to service

# Uberdek System

## Easy 3-day Install

Contractors and DIY enthusiasts will appreciate Uberdek's ease of installation. Transform old, spalled or worn concrete in just 3 days. Create the look of newly poured or decorative concrete

**Day 1:** Clean and prep the substrate before applying a primer coat of CP1000 acrylic primer. Let the primer dry overnight.

**Day 2:** Mix and apply one or two coats of Uberdek. (A colorant may optionally be added to the mix.) Uberdek may be applied with a squeegee, a trowel for a decorative finish, sprayed with a hopper gun for a knock-down finish, or broom finished.

**Day 3:** Apply stains or dyes (optional), then apply your choice of concrete sealer.
